

TOP LANGUAGE IMMERSION DESTINATIONS: Costa Rica

Your group will be connected with guides trained in English, French, Spanish, German, and Italian. Beyond the traditional opportunities for language immersion trips, your group can help local schools, work inside protected areas, help a local animal rescue center, or with local NGOs where the students can volunteer. Our programs go from a day to 3 months or more. Depending on your educational goals, you can stay with local families, stay at a communitarian lodge, or stay in a hotel near your project. Everything is determined according to your preferences and budget. Beside volunteering, your student will learn the full Costa Rican experience. Give us the opportunity to craft your next Costa Rica language immersion trip and let us prepare the most extraordinary educational experience of your lifetime!
